Report of the Board of Education

OF THE TOWN OF BRENTWOOD, FOR THE YEAR
ENDING FEBRUARY 15, 1899.

Whole number of children between the ages of five and fifteen, as enumerated by the Board, 128.

Whole number of children five years of age, and upwards, who have attended school in town during the year, 122.

In a survey of the schools during the past year we find little to condemn and much to approve.

The attendance in several schools has fallen short of the standard necessary to secure the highest success.

The South Road and Crawley's schools make the best showing in this particular.

It is to be hoped that during the coming year every scholar in town will make an effort to be present every half day in the school year and thus derive all the benefit possible from the school.

It has been the aim of your committee to secure teachers of experience and ability, and in every instance, teachers whose reputations were already made have justified the expectations entertained and all have been unremitting in their efforts to do faithful work.

Parents should take an interest in the welfare of the schools. They should not forget that the discipline of the school-room can only supplement, not take the place of good home training in habits of punctuality, obedience and industry.

The absence of proper home instruction can defeat the best efforts of the best teachers.
